# THE ROM BI ADVANTAGE

The Recycling Operations Manager (ROM) software is now teamed with Microsoft's Business Intelligence software for next generation reporting.

**Tailored to Your Needs:** ROM BI adapts to your unique requirements, focusing on the metrics essential to your business. Taking 25 years of recycling software experience into account, ROM BI is adapted and suited to recycling's unique requirements, focusing on the data that matters to you.

**Stay Ahead of the Curve:** - Harness near real-time insights for quick, data driven decisions. Infinite drill down possibilities help you to identify potential opportunities or areas for improvement.

**Robust Security:** Protect sensitive information with advanced security features and encryption.

**Seamless Integration with Power BI:** We've taken all of the complexity out of it, providing a smooth, powerful interface that allows you to customize it, change it and adapt it to your business.

> We decided to choose ROM because it was one of the most complete, out of the box solutions for the scrap business. We liked the fact that it was programmable and customizable. The customizable reports were the final carrot that led us to choose ROM.
